

RISHIVAN EIGHT RISHIS — COMPLETE DOMAIN OWNERSHIP AND QUESTION COVERAGE BLUEPRINT

Implementation specification for Bharat + AI / Astrology Research / Engineering Teams

Objective: make every major user question routable to the right specialist Rishi(s), while preserving one shared canonical knowledge core.

IMPORTANT ARCHITECTURE: The eight Rishis are not eight separate astrology databases. They are eight specialist reasoning systems over one shared Rishivan Core: verified books + astronomy calculator + ontology + Koonji + knowledge graph + validation laboratory.

Goal: A user should be able to ask almost any meaningful question about their life, and Rishivan should know which Rishi owns it, which other Rishis must be consulted, which knowledge domains are relevant, and what evidence must be examined.

1. WHAT THE EIGHT-RISHI SYSTEM MUST SOLVE

The team should not think in terms of “eight chatbots.” Think in terms of eight expert departments inside one intelligence system.

USER ↓ QUESTION / INTENT CLASSIFIER ↓ PRIMARY RISHI ↓ SECONDARY RISHI(S), if the question spans dimensions ↓ SHARED CALCULATION ENGINE ↓ DOMAIN-SPECIFIC KOONJI + SOURCE RETRIEVAL ↓ RISHI REASONING ↓ CROSS-RISHI EVIDENCE COMPARISON ↓ MASTER SYNTHESIS ↓ FINAL ANSWER + SOURCES + UNCERTAINTY

Rule: no Rishi is allowed to invent a rule simply because the question falls inside its domain. Every canonical rule must trace to the shared source/knowledge layer.

2. THE SHARED RISHIVAN CORE — EVERY RISHI GETS THIS

Shared layer	What it contains
Master corpus	All approved books/manuscripts/editions, not divided permanently between Rishis.
Source registry	Book ID, author, edition, language, provenance, rights, hash, review status.
Verified text	Original-language text, transliteration, verified translation and commentary layers.
Ontology	Planet, sign, house, nakshatra, Varga, Dasha, Yoga, Karaka, event, question, etc.
Koonji	Machine-readable rules with conditions, modifiers, exceptions and citations.
Knowledge graph	Relationships between concepts, rules, sources, charts and events.
Astronomy engine	Deterministic planetary/Ascendant/time calculations.
Chart engine	D1, Vargas, Dashas, transits, Panchanga, strength and supported calculations.
Evidence engine	Source authority, contradictions, confidence and validation.
Validation lab	Backtesting, blind tests, regression tests, expert review.

The specialization is created by each Rishi's domain ownership + protocol + Koonji subset + routing rules.

3. THE EIGHT RISHIS — FINAL DIVISION

Rishi	Dimension	Primary responsibility
1. ATMA	Self / Identity / Life Blueprint	Who the person is, fundamental tendencies, strengths, weaknesses, life themes, identity and overall chart promise.
2. PREMA	Love / Marriage / Relationships	Love, spouse, marriage, compatibility, relationship quality, separation, remarriage and relationship timing.
3. ARTHA	Wealth / Resources / Prosperity	Money, wealth, income, assets, financial cycles, business prosperity, wealth Yogas and financial timing.
4. KARMA	Career / Business / Achievement	Profession, employment, business, leadership, status, reputation, achievement and career timing.
5. VANSH	Family / Children / Lineage	Parents, siblings, family, children, childbirth, lineage, family dynamics and children's themes.
6. AAROGYA	Health / Vitality / Resilience	Traditional astrological health/vitality indicators, vulnerabilities and wellness-oriented interpretation.
7. YATRA	Movement / Property / Change	Travel, foreign settlement, migration, relocation, property, residence and major life transitions.
8. DHARMA	Dharma / Karma / Spirituality / Sacred Knowledge	Bhagavad Gita, shlokas, Dharma, Karma, Moksha, spiritual purpose, philosophical context and sacred-text interpretation.

Coverage principle: Together, these eight dimensions are intended to cover essentially every normal life-domain question. Questions outside them are routed through the Master layer and assigned to the closest domain(s) or marked as requiring a future specialist.

4. RISHI 1 — ATMA RISHI

Mission: Understand the person before understanding their events. Atma Rishi creates the foundational “Life Blueprint” that other Rishis may use as context.

Questions it owns:

Who am I? What is my personality? What are my natural strengths? What are my weaknesses? What motivates me? What are my talents? What kind of environment suits me? What are my dominant tendencies? What is my life direction? What are my major life themes? What kind of person am I likely to become? What are my natural leadership/social/intellectual tendencies? What does my chart say about self-development? What are my core inclinations?

Astrological coverage: Lagna, Lagna lord, Sun, Moon, Nakshatra, planetary dignity and strength, aspects, conjunctions, major Yogas affecting identity, relevant Vargas, Jaimini identity indicators, Atmakaraka/Karakamsha where appropriate.

Other knowledge: selected Samudrika/physiognomy can be consulted when the user explicitly asks for appearance/personality reading, but it remains a separate evidence stream from natal astrology.

Protocol: 1) chart framework → 2) Lagna/Lagna lord → 3) Sun/Moon → 4) strength → 5) Nakshatra → 6) major combinations → 7) relevant Vargas → 8) Jaimini → 9) synthesis → 10) uncertainty.

Primary sources: BPHS; Brihat Jataka; Phaladeepika; Saravali; Jataka Parijata; Jaimini Sutras; Nakshatra literature; selected Samudrika corpus.

5. RISHI 2 — PREMA RISHI

Mission: Own the complete relationship lifecycle—not just “marriage prediction.”

Questions it owns: Will I marry? When? What kind of spouse? Where/how might I meet them? Love or arranged tendency? Compatibility? Relationship quality? Why are relationships difficult? Marriage delay? Multiple relationships? Separation? Divorce indicators? Remarriage? Spouse career/temperament? Relationship with in-laws? Marriage after a particular age? Best periods for relationship? Compatibility between two charts?

Astrological coverage: 7th house/lord, Venus, Jupiter where relevant, 2nd/8th/11th, D9, Darakaraka, Upapada, Arudha-related factors, relevant Yogas, dignity, aspects, conjunctions, Dashas, transits, Jaimini, KP and Nadi.

Protocol: promise → spouse indicators → relationship quality → D9 confirmation → Jaimini indicators → Yoga/affliction/modification → Dasha → transit → cross-school timing → compatibility if two charts → confidence.

Primary sources: BPHS; Phaladeepika; Saravali; Jataka Parijata; Jaimini Sutras; Upapada/Darakaraka literature; KP corpus; Nadi marriage/timing corpus.

6. RISHI 3 — ARTHA RISHI

Mission: Determine the person's relationship with resources, prosperity and financial opportunity. This Rishi must be far deeper than a “2nd + 11th house” checker.

Questions it owns: Will I be wealthy? How much wealth potential? Income capacity? Savings? Assets? Business wealth? Sudden gains? Financial instability? Wealth accumulation? Property wealth? Inheritance? Speculation? Entrepreneurship wealth? Passive income? Major financial cycles? When can finances improve? Which periods are financially stronger?

Core wealth analysis: 2nd, 5th, 9th, 10th, 11th; their lords; Lagna/Lagna lord; D2; relevant D10; Dhana Yogas; Raja Yogas; Mahapurusha Yogas; Lakshmi-type prosperity combinations; Neecha Bhanga where applicable; planetary dignity; Shadbala; Avastha; Ashtakavarga; benefic/malefic influence; Dashas; transits; Jaimini; KP; Nadi.

Mandatory Yoga logic: Formation → exact conditions → strength → cancellation/modification → relevant house context → activation → timing → corroboration. Never count a Yoga as a guaranteed outcome.

Protocol: baseline wealth promise → wealth combinations → strength → modification/cancellation → Vargas → Dasha activation → transits → cross-school evidence → event windows → confidence.

Primary sources: BPHS; Brihat Jataka; Phaladeepika; Saravali; Jataka Parijata; Sarvartha Chintamani; Bhavartha Ratnakara; Jaimini; Nadi; KP; Shadbala/Ashtakavarga corpus.

7. RISHI 4 — KARMA RISHI

Mission: Own the entire career/profession/achievement/business dimension.

Questions it owns: What career suits me? Job or business? Which industry? Leadership? Entrepreneurship? Government/private sector? Professional success? Promotions? Career changes? Reputation? Authority? Professional recognition? Business growth? Partnership/business career? Career abroad? Job loss/change? When should I change career? When can business grow?

Core analysis: 10th house/lord; Lagna/lord; 6th; 2nd; 11th; relevant planets; D10; professional Yogas; Raja/Mahapurusha combinations; strength; Dashas; transits; Jaimini; KP; Nadi.

Protocol: career promise → job/business orientation → profession categories → D10 → Yogas → strength → Dasha → transit → cross-school confirmation → timing.

Primary sources: BPHS; Brihat Jataka; Phaladeepika; Saravali; Jataka Parijata; Jaimini; KP; Nadi; D10/profession literature.

8. RISHI 5 — VANSH RISHI

Mission: Family, children and lineage across the whole life cycle.

Questions it owns: Family life? Parents? Mother? Father? Siblings? Family wealth? Family responsibilities? Children? Number/possibility of children in traditional astrology? Child-related timing? Relationship with children? Children's themes? Education of children? Family expansion? Lineage? Family conflict?

Core analysis: 2nd, 3rd, 4th, 5th, 9th; relevant lords; Karakas; D7; D12; Dashas; transits; Jaimini; relevant Nadi rules.

Protocol: identify relationship → natal promise → relevant house/lord → Karaka → Varga → combinations → strength/modifiers → Dasha → transit → cross-check.

Primary sources: BPHS; Phaladeepika; Saravali; Jataka Parijata; Jaimini; D7/D12 literature; Nadi family/children corpus.

9. RISHI 6 — AAROGYA RISHI

Mission: Traditional astrology of vitality, constitution and periods of vulnerability. It is a wellness/astrological interpretation engine, not a medical diagnostic system.

Questions it owns: Traditional vitality indicators? Strong/weak constitution? Periods traditionally associated with vulnerability?

Lifestyle-oriented astrological themes? Recovery/resilience themes? What does the chart traditionally say about bodily tendencies?

Core analysis: Lagna/1st; 6th; 8th; 12th; Sun; Moon; relevant planetary strength; Dasha; transit; traditional medical-astrology combinations; relevant Vargas.

Strict rule: Never diagnose a disease, predict death as certainty, prescribe treatment, or tell the user to avoid medical care. Present traditional interpretations with clear uncertainty.

Primary sources: BPHS; classical Jyotisha health chapters; Brihat Jataka/Phaladeepika/Saravali where relevant; traditional medical-astrology literature. Build a separate reviewed corpus for this domain.

10. RISHI 7 — YATRA RISHI

Mission: Movement, property, relocation and major life transitions.

Questions it owns: Foreign travel? Foreign settlement? Migration? Relocation? Which periods favor moving? Property purchase?

Property sale? Residence? Real estate? Vehicle/travel themes? Major life transitions? Sudden changes? Long-distance journeys?

Core analysis: 3rd, 4th, 8th, 9th, 12th; Rahu/Ketu; relevant lords; D4; Dashas; transits; Jaimini; Nadi; Prashna for a specific immediate decision.

Protocol: identify movement/change type → natal promise → relevant houses/lords → Varga → Dasha → transit → Prashna if appropriate → timing → corroboration.

11. RISHI 8 — DHARMA RISHI

Mission: Be the sacred/philosophical knowledge specialist and the interpreter of Dharma, Karma and spiritual questions.

Questions it owns: What is my Dharma? What does Karma mean in this tradition? What does the Bhagavad Gita say about this situation? Which shloka is relevant? What is the philosophical meaning of a life event? Spiritual path? Moksha themes? Detachment? Duty? Purpose? Meditation/yoga philosophy? Rebirth concepts? What do classical texts say?

Core corpus: Bhagavad Gita; principal Upanishads; Yoga Sutras; Samkhya; Vedanta works; selected Puranic karma/rebirth literature; classical Jyotisha spiritual indicators; Jaimini Atmakaraka/Karakamsha literature; relevant Tantra/Agama/Yoga texts where appropriate.

Critical separation: Scriptural teaching ≠ astrological inference. A shloka must be cited and interpreted in context. An astrological indication must be labelled as astrological interpretation.

Protocol: identify philosophical question → select tradition → retrieve source/shloka → contextual interpretation → if requested, separately analyze astrology → synthesize without claiming certainty beyond the source.

Special role: Dharma Rishi can provide the philosophical “meaning layer” after other Rishis identify an event, but it must not retroactively invent a spiritual explanation merely to make the story sound profound.

12. QUESTIONS THAT CROSS MULTIPLE RISHIS

The Master Rishivan must recognize that many real questions are multidimensional.

User question	Primary Rishi	Secondary Rishis
“Will I become a billionaire?”	Artha	Karma + Atma + Yatra
“Should I leave my job and start a business?”	Karma	Artha + Yatra + Dharma if purpose is asked
“When will I marry and what will my spouse be like?”	Prema	Atma + Artha + Time protocol
“Will my business make me rich?”	Karma	Artha + Atma
“Should I move abroad?”	Yatra	Karma + Artha + Prem/Vansh if family impact is asked
“How will my children be?”	Vansh	Atma + Artha + Dharma
“What is my life purpose?”	Dharma	Atma + Karma
“Why am I facing repeated relationship problems?”	Prema	Atma + Dharma
“What period of my life will be most successful?”	Atma/appropriate event Rishi	Artha + Karma + Time synthesis
“What does this health period mean?”	Aarogya	Atma + Dharma if spiritual context is requested
“Should I buy this property now?”	Yatra	Artha + Prashna where applicable
“What does my palm say about my career?”	Karma	Atma + Samudrika/palmistry subsystem
“What does my name/date say about business?”	Artha/Karma	Numerology subsystem + Atma
“What does my chart + palm + numerology say about me?”	Atma	All relevant modalities + Master synthesis

Master rule: Do not invoke all eight by default. Invoke the minimum set that provides independent, relevant evidence. Invoke all eight only for deliberately comprehensive “life map” requests.

13. NUMEROLOGY, PALMISTRY, FACE READING, VASTU — WHERE DO THEY BELONG?

These systems should not become ninth, tenth, eleventh and twelfth Rishis unless the product later needs that scale. For the first architecture, make them shared specialist modalities callable by the relevant Rishi(s).

Modality	Owner / routing
Numerology	Atma for identity/name; Artha for financial/business numerology; Prema for relationship compatibility; Karma for career/name/business.
Palmistry / Samudrika	Atma for personality/character; Karma for career; Prema for relationship; Artha for wealth themes. Always separate visual observation from interpretation.
Face reading / physiognomy	Primarily Atma; optionally Karma/Prema when directly relevant.
Vastu	Yatra for property/residence; Artha for property/wealth context; Atma for personal environment questions.
Prashna	A cross-domain methodology invoked when the user asks a specific question at a specific time.
Muhurta	Cross-domain timing service invoked when choosing a date/time for marriage, business, travel, property, etc.

The Master layer decides when these modalities add evidence. They must never silently override natal astrology.

14. WHAT EACH RISHI MUST HAVE IN ITS OWN KOONJI

Koonji section	Required content
Question taxonomy	Every question type the Rishi can answer.
Input requirements	Birth data, partner chart, palm image, property details, question time, etc.
Analysis order	Exact ordered checklist.
Required concepts	Houses, planets, Vargas, Yogas, Dashas, Karakas, etc.
Rule library	Machine-readable rules relevant to the Rishi.
Source mapping	Book → chapter → verse/page → rule.
Modifiers	Strength, dignity, aspects, cancellation, exceptions, etc.
Timing layer	Dashas/transits/Muhurta/Prashna as applicable.
Cross-Rishi triggers	When another Rishi must be consulted.
Output schema	Structured evidence before prose.
Confidence	Evidence/validation score.
Forbidden claims	What the Rishi is not allowed to assert.

15. BOOKS SHOULD BE MAPPED TO RISHIS — BUT NOT EXCLUSIVELY

This is the exact answer to the original “books corpus + domain mapping” problem.

A book can map to many Rishis. The mapping is weighted by concept coverage, not by ownership.

Source family	Atma	Prema	Artha	Karma	Vansh	Aarogya	Yatra	Dharma
BPHS	High	High	High	High	High	High	High	High
Brihat Jataka	High	High	High	High	High	High	High	Medium
Phaladeepika	High	High	High	High	High	High	Medium	Medium
Saravali	High	High	High	High	High	High	Medium	Medium
Jataka Parijata	High	High	High	High	High	High	Medium	Medium
Jaimini Sutras	High	High	High	High	High	Medium	High	High
Deva Keralam / Nadi	Medium	High	High	High	High	Medium	High	Medium
KP corpus	Medium	High	High	High	Medium	Medium	High	Low
Prashna corpus	Medium	High	High	High	High	Medium	High	Medium
Tajika corpus	Medium	High	High	High	Medium	Medium	High	Low
Muhurta corpus	Low	High	High	High	Medium	Low	High	Medium
Samudrika/palmistry	High	Medium	Medium	Medium	Medium	Low	Low	Low
Numerology	High	Medium	High	High	Medium	Low	Low	Medium
Vastu	Medium	Low	High	Medium	Medium	Low	High	Medium
Bhagavad Gita / Upanishads	Medium	Low	Low	Low	Medium	Low	Low	Very High

Note: These are routing priorities, not claims that a source contains equal coverage of every Rishi. The production matrix must be generated chapter/section/rule by rule.

16. THE RISHI CONSTITUTION — STANDARD TEMPLATE

RISHI_ID NAME MISSION PRIMARY_DOMAINS SECONDARY_DOMAINS QUESTION_TYPES REQUIRED_INPUTS PRIMARY_SOURCES SECONDARY_SOURCES
ALLOWED_CONCEPTS KOONJI_RULE_SET ANALYSIS_PROTOCOL TIMING_PROTOCOL CROSS_RISHI_TRIGGERS EVIDENCE_POLICY CONFIDENCE_POLICY
FORBIDDEN_CLAIMS OUTPUT_SCHEMA VALIDATION_DATASET VERSION

Every Rishi should be implemented from this same schema. That makes the eight systems maintainable and comparable.

17. EXAMPLE — ARTHA RISHI'S COMPLETE WEALTH DECISION TREE

This is the level of specificity the team should build for each Rishi. The following is the architecture; the detailed individual rules are extracted and source-linked from the corpus.

QUESTION “Will I become wealthy?” STEP 1 — DEFINE WEALTH Income / savings / assets / business wealth / inheritance / speculative gains / status STEP 2 — BASELINE PROMISE Lagna + Lagna Lord 2nd + 2nd Lord 11th + 11th Lord STEP 3 — SUPPORTING WEALTH HOUSES 5th / 9th / 10th / relevant house relationships STEP 4 — YOGAS Dhana Yogas Raja Yogas Mahapurusha Yogas Lakshmi-type combinations Other source-specific prosperity combinations STEP 5 — VERIFY Formation conditions Strength Dignity Aspects Conjunctions Combustion/retrogression where relevant Cancellation/modification Functional role Varga confirmation STEP 6 — SPECIALIZED CHARTS D2 and other relevant Vargas according to the selected school STEP 7 — ACTIVATION Mahadasha Antardasha Relevant sub-periods Transit triggers STEP 8 — CROSS-SCHOOL Jaimini KP Nadi Other approved methods STEP 9 — VALIDATION Historical performance of the applicable rules STEP 10 — SYNTHESIS Potential Magnitude category Sources of wealth Strong periods Weak periods Uncertainty Evidence

This demonstrates why “wealth = 2nd + 11th” is far too simplistic for Rishivan.

18. PERFORMANCE TESTING BY RISHI

The team should maintain an independent test suite for every Rishi.

Rishi	Example evaluation questions
Atma	Personality, temperament, life themes, strengths, identity.
Prema	Marriage timing, spouse characteristics, relationship quality, compatibility.
Artha	Wealth potential, financial periods, business prosperity.
Karma	Career direction, job/business, professional timing.
Vansh	Family dynamics, children-related traditional predictions, family timing.
Aarogya	Traditional vitality indicators and period interpretation; safety compliance.
Yatra	Relocation, foreign settlement, property and transition timing.
Dharma	Source fidelity for scripture/shlokas and philosophical interpretation.

Track: routing accuracy + calculation accuracy + rule retrieval accuracy + source fidelity + reasoning accuracy + prediction performance + hallucination rate + expert score + calibration.

19. THE MASTER RISHI — COMPREHENSIVE LIFE ANSWER

When the user explicitly asks for a “complete life reading,” the Master Rishivan can orchestrate all eight dimensions.

MASTER LIFE MAP ATMA Who am I? PREMA How do I love and relate? ARTHA How do resources and prosperity work? KARMA What is my career and achievement path? VANSH What is my family/children/lineage dimension? AAROGYA What are the traditional vitality themes? YATRA Where do movement/property/change enter my life? DHARMA What do Dharma, Karma and spiritual teachings contribute? ↓ MASTER SYNTHESIS Then add: • Timing • Cross-domain interactions • Major life phases • Conflicts • Evidence • Uncertainty • Source references

The result is not eight separate mini-reports. The Master Rishivan should identify relationships between dimensions.

Example: a career change may affect wealth, relocation, relationship and Dharma simultaneously. The system should recognize that dependency.

20. FINAL RULE — THE EIGHT RISHIS MUST COVER THE WHOLE HUMAN QUESTION SPACE

The team should use the following test: if a reasonable user can ask it about their life, the routing system must either assign it to one Rishi, assign it to multiple Rishis, or explicitly classify it as outside the currently supported knowledge boundary.

No “orphan questions.” No unexplained black box. No Rishi should say “this is not my area” without the Master router knowing which specialist should receive it.

At the same time, “everything” does not mean the system should pretend to know everything. Unsupported questions must be surfaced as unsupported rather than hallucinated.

21. FINAL IMPLEMENTATION DIRECTIVE TO BHARAT

Build one shared Rishivan Core and eight specialist Rishi Constitutions.

Do not divide the books into eight permanent piles. Instead, map every source to the concepts and domains it actually supports. Then each Rishi retrieves the subset of the shared corpus relevant to its own question protocol.

The eight Rishis are therefore:

ATMA — Self & Life Blueprint

PREMA — Love & Relationships

ARTHA — Wealth & Prosperity

KARMA — Career & Achievement

VANSH — Family & Children

AAROGYA — Health & Vitality

YATRA — Movement, Property & Change

DHARMA — Dharma, Karma, Spirituality & Sacred Knowledge

And above them: MASTER RISHIVAN — the orchestrator and synthesis engine.

Final architecture: One truth layer → eight expert lenses → evidence comparison → one coherent Rishivan answer.

This is the structure the engineering team should implement first. The next technical artifacts should be the eight machine-readable Rishi Constitutions, the question taxonomy, the Book × Concept × Rishi mapping schema, and the Koonji rule schema.
